

Ritik Rauniyar

AI Engineer | Full Stack Developer

Gurugram, India | ritikrauniyar93@gmail.com | +91-77598 94307 | LinkedIn | GitHub | Portfolio

SUMMARY

Full Stack AI Application Engineer with 1+ year of professional experience (plus prior internship) building end-to-end software solutions including CRM systems, web applications, and cross-platform mobile apps. Skilled in React.js, Next.js, Flutter, and Python backend development, with experience integrating Generative AI (LLMs, LangChain) to streamline business workflows. Proven track record of independently designing, developing, and deploying scalable, production-ready systems across cloud architectures (AWS, Vercel) for real-time tracking, automation, and enterprise management.

CORE SKILLS

React.js, Next.js, JavaScript, Flutter (Dart), Python, Flask, FastAPI, REST APIs, WebSockets, MySQL, PostgreSQL, SQLite, AWS EC2, Nginx, Git, RBAC, LangChain, LLMs, TensorFlow, System Design, CI/CD

EXPERIENCE

KLFPRO Consulting Pvt. Ltd.

August 2025 – Present

AI Engineer & IT Head

- Led end-to-end development of **4 production platforms** (CRM, HRMS, KLF Times, KLF Healthcare) using **Next.js**, **React.js**, **Tailwind CSS**, and **Flutter**, as sole engineer responsible for architecture, development, and deployment.
- Architected an offline-first Field Agent Tracking system; built a Flutter app with background GPS tracking and local **SQLite** storage, paired with a concurrent **Python (Flask)** backend for reliable data sync during network drops.
- Engineered a real-time Live Tracking dashboard for the CRM using **WebSockets (Flask-SocketIO)** and **JavaScript**, broadcasting live agent locations with low latency.
- Designed AI-powered automation tools, including an NPI Lead Extractor leveraging **LLMs** and **LangChain**, to automate healthcare provider data extraction and reduce manual entry effort.
- Managed end-to-end cloud infrastructure and **CI/CD** pipelines on **AWS EC2**, configuring **Nginx** reverse proxies, **Gunicorn WSGI**, and **Systemd** services for stable **REST APIs**.
- Developed full-featured CRM and HRMS systems implementing **Role-Based Access Control (RBAC)**, automated payroll, and GPS-based attendance tracking.

IBM SkillBuild

June 2023 – August 2023

Data Analytics Intern

- Analyzed structured and unstructured datasets using **Pandas** and **NumPy**, performing **Exploratory Data Analysis (EDA)** to derive business insights.
- Built predictive **Machine Learning** models and designed interactive data visualization reports using **Power BI**.

PROJECTS

Brain MRI Tumor Detection

May 2023

- Developed a CNN-based deep learning model using **TensorFlow** and **Keras** to classify brain MRI scans.
- Applied **Grad-CAM** techniques for model interpretability, improving diagnostic reliability.

Ride-Sharing Analytics Platform

May 2025

- Built predictive demand forecasting models using **Python**, **Pandas**, and **Matplotlib** to optimize routing efficiency.

- Analyzed core system design concepts and algorithms; co-authored a research paper.

TECHNICAL SKILLS

- **Frontend:** React.js, Next.js, Tailwind CSS, HTML5, JavaScript (ES6+), Leaflet.js
- **Mobile Development:** Flutter (Dart), Cross-platform Development, Background Services
- **Backend:** Python (Flask, FastAPI), REST APIs, WebSockets (Socket.IO)
- **Database:** PostgreSQL, MySQL, SQLite
- **AI/ML:** Generative AI, LLMs, LangChain, TensorFlow, PyTorch
- **Cloud & DevOps:** AWS EC2, Vercel, Cloudflare, Nginx, Gunicorn, Systemd, Git, CI/CD
- **Tools:** Supabase, Firebase, Power BI, VS Code, Postman
- **Concepts:** RBAC, Offline-First System Design, API Integration, Automation

EDUCATION

- **Bachelor of Technology (B.Tech) in Computer Science and Engineering** – Kalinga University, Raipur (2021 – 2025)

CERTIFICATIONS

- **Research Papers:** Real-Time Chat Application (International Journal) | Ride-Sharing Analytics
- **Certifications:** IBM Data Analytics Internship | Hadoop | Big Data | Microsoft (OS, Security) | IIoT & Robotics
